Answer: OLIO Originally published: August 12, 2019 Photo: Pixabay (Pexels)For some reason, many people believe that the ability to solve crosswords is a talent doled out at birth to a select few. This couldn't be further from the truth. Crosswords are not an immutable test of your vocabulary or intelligence—it is a skill that anyone can develop. Learning new skills is one of the best ways to make yourself both marketable and happy, but... Read moreNo other word game or puzzle asks quite as much of your mind as a crossword puzzle. Experienced puzzles consider not only the literal meaning of every clue, but also similar ones we've seen before, often repetitive responses, syntax quirks, puns, cultural references-and, of course, the subject of the puzzle. Unfortunately, this that crosswords can be completely inhospitable to newcomers. Everyone starts somewhere, and no matter what your abilities look like now, here are four general strategies to help you improve. Do Puzzles Every Day The only way to improve on crossword puzzles is to do a lot of them, and the best way to do that is to work them into your daily routine. For me, this means tackling a few puzzles from one by one Book of 365 Will Shortz crossword puzzles before bed every night. My mom prints the Crosswords of The Washington Post and chips away at them during the morning; My friends who commute by bus or train are intransigent New York Times crossword app followers. G/O Media can get a New York Times puzzle board is most peoples' crossword drug portal for a reason: it's easy to find and have a built-in scoring difficulty. Mondays are the easiest, Saturdays are the hardest, and puzzles ramp up day by day so you can choose and choose the ones that work for you. That said, the New York Times is far from the only publisher out there. The Washington Post, Los Angeles Times, and Merriam-Webster also publish daily American style crosswords; if cryptic crosswords are your jam, try The Guardian. Some organizations, such as Queer Crosswords and Puzzle for Progress, will even send you original themed puzzles as a reward for non-profit donations. Just remember that each publication has its own style-mastering the difficult formulation idea in a Saturday New York Times puzzle won't necessarily translate into one from the Post, and vice versa. Use an Applf you really want to up your crossword game, subscribing to an app like the one from the New York Times, is a great idea. As much as I love them, paper puzzles just can't touch the user-friendly features you get with an app. You can easily check your work or reveal the letter replies by letter, instead of accidentally peeking across the solution. This demystifies the clues enough to make them possible, which is exactly what you want. Also, most apps time your work, which makes it easy to measure your progress. But really, the biggest advantage is accessibility: carrying around thousands of digital puzzles in your pocket makes it easy to do a lot of puzzles. Know when-and-how-to CheatCheating is a sensitive topic among crossword lovers, but there is no denying that it has its place. Crosswords should be fun, and repeatedly banging my head against the same wall, praying for a different result, is not my idea of fun. Besides, frustration is a lousy teacher; If you don't have serious competitive puzzle ambitions, stubbornly refusing to search for answers or check your work will get you nowhere. Many games require a great investment time-at least, if you want to have the best tool, the ... Read moreEdics, you need to solve every clue you possibly can without help, but you can't improve without a challenge. A bit of cheating strategy can be your even through the hardest puzzles. Apps make it extremely easy: just check or reveal letters one at a time until you solve a particularly unpleasant element. This just gives you enough information to (mostly) hack on your own, which in turn makes the answer more likely to stick to your memory. Paper puzzles make cheating strategy a little tougher, but thanks to the Internet, not by much. If you're stuck in a print crossword, Google the whole clue in quotes. Configure your search around the indicator rather rather rather say, how many letters you need to work with will help you understand what the item wanted from you. Over time, you'll find yourself needing less and less help solving puzzles that previously would have really been stumps. Studying UpIf you are serious about crossword knowledge, the Internet is full of like-minded people who would like to help. A blog like Rex Parker is a great place to start. It solves the New York Times puzzle every day, compares the difficulty with other puzzles from that day of the week, and breaks down key elements/response pairs in a short post. Between posts and comments, you'll get a more complete picture of the solution than if you'd just looked at the answers. You can also specialize even more and refresh your crosswords—words that often appear in crosswords but almost never in conversation. The New York Times has a quiz that tests your crossword knowledge, and there's a more general guide Dictionary.com. Perhaps predictably, there is also an entire website dedicated to crossword puzzles, with a new word that appears every day and an extensive archive. If a statistical approach is more your speed, there are crossword answer databases out there. Data scientist Noah Veltman analyzed a set of New York Times crossword data and answers from 1996-2012, and then arranged them with a crossword puzzle and how often they appeared. You can filter lists based on the minimum number of impressions or word length and see details about any given response. Similarly, Xwordinfo.com will show you the most popular answers and clues to times puzzles by the time or length of the word. Hell, you could really go all-out and code yourself some educational programs like this guy did, although it's unclear if his approach is more effective than just doing a bunch of crossword puzzles. That doesn't mean you have to build a robot or memorize clues to solve crossword puzzles more effectively; the best training strategy is the one that makes you happy. It doesn't matter how many puzzles you solve or how fast you can solve them, you just keep them. If you can do that, you'll never stop getting better. Improvement.
